

Ασφαλέστερα στηθαία οδών από σκυρόδεμα με καουτσούκ από ανακυκλωμένα ελαστικά

Safer Road Barriers made of concrete with rubber particles from recycled tyres

From waste to **RESOURCES**

This research proposes to develop optimised steel fibre-reinforced rubberised concrete mixtures as well as road barrier designs, which will lead to the development of SAFER road barriers with outstanding deformability and structural integrity

Innovative eco-material for Forgiving Road Infrastructure

Steel-fibre reinforced Rubberised Concrete

Energy absorbing road barriers

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 748600
