The approval of the thesis by the Department of Civil Engineering and Geomatics does not imply necessarily the approval by the Department of the views of the writer.

I would first like to thank my advisor Dr. Elia Tantele of the Department of Civil Engineering and Geomatics at Cyprus University of Technology for the support that she gave me to proceed with this subject.

I would also like to thank Mr. Evangelos Socratous Health and Safety Officer of the Department of Labour Inspection for bearing with my curiosity and helping me through some issues.

Finally I would like to express my profound gratitude to my parents for the faith that they show to me by supporting and encouraging me.

ABSTRACT

This research is about a new approach on Health and Safety Inspection procedures for construction sites. The main international and national organizations and standards are analyzed. Special focus was given in the procedures of Department of Labour Inspection in Cyprus, and the new approach of Vision Zero Strategy.

The outcome of this research is a New Checklist that will advance the Health and Safety inspections on sites. It is a checklist for the inspectors and for the site engineers too. The purpose is to merge the existing procedures with new concepts.

Keywords: Health and Safety, construction industry, Vision Zero Strategy, Department of Labour Inspection
